Distinct people who posted about each subject, 29 Jun – 5 Jul 2026, as of 25 Sep 2026 13:30Z; in development. Each bar is scaled to its own platform's first place (Reddit 13,269, Hacker News 43), so no two columns share a scale. A hidden figure shows its reason on the release page, never a number. All 85 subjects are at aidran.ai/releases/2026-W27.

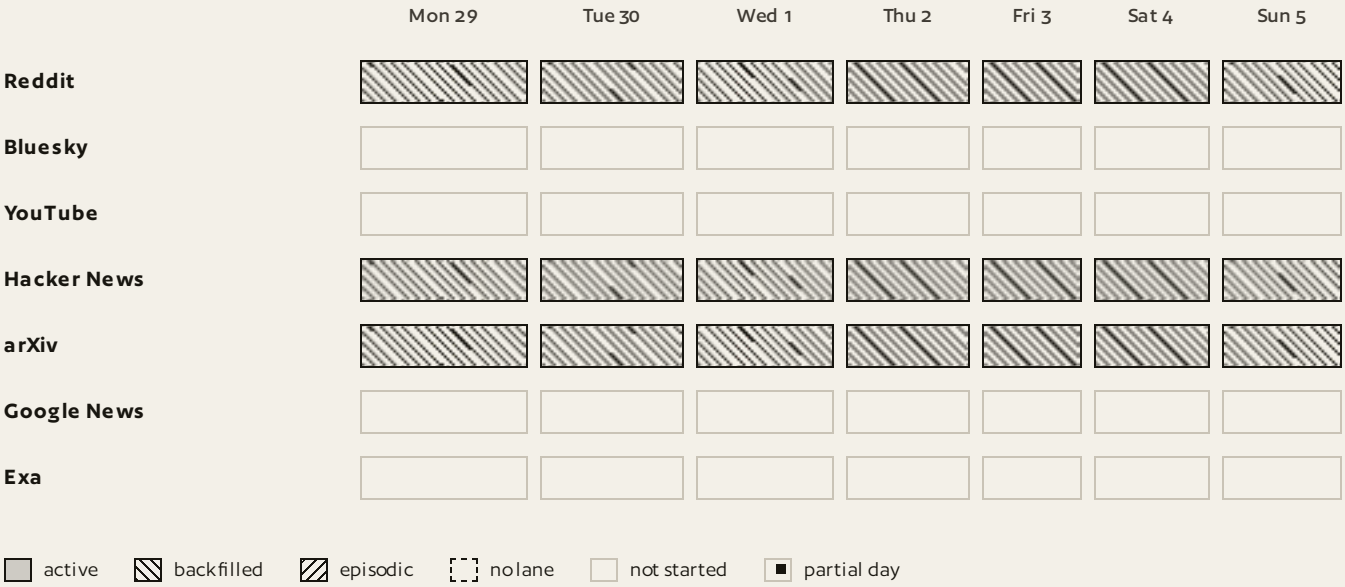
29 Jun – 5 Jul 2026, as of 25 Sep 2026 13:30Z, counted from posts' own data. People are distinct platform identities, never added across platforms, and not applicable on article sources. Reasons for qualified values are in the brief. Reasons for totals without a final value are on the conditions sheet.

COVERAGE THIS WEEK

What AIDRAN was collecting, day by day

A day can hold posts even when collection hadn't started: they were captured later.



Each lane's status for each day of 2026-W27, from its coverage as of 25 Sep 2026 13:30Z. Every status is shown by shape and a label, never by colour alone; each platform's days, in words, are on the release page.
